**MARLEY ALUTEC'S  
BRAND IS BUILT ON HIGH  
QUALITY PRODUCTS  
AND OUTSTANDING  
CUSTOMER SERVICE,  
WITHOUT COMPROMISE.**

# BEST IN CLASS

Marley Alutec is well-established and part of the international group, Aliaxis. We value our reputation and this is why we are always aiming to be best in everything we do.

Marine grade aluminium is used on all Alutec systems and in combination with architectural grade polyester powder coating provides an attractive, durable and maintenance-free finish. For additional peace of mind, all of Alutec's products are manufactured to and in excess of the appropriate BS or EN Standards.

We offer solutions in three distinct areas:

- rainwater systems
- fascia, soffit and coping
- roof and shower outlets

We are the aluminium specialists in our field.

**ALUTEC**  
ALUMINIUM RAINWATER SYSTEMS

# SUSTAINABILITY

For a material to be considered sustainable, it must be recyclable, have a long life expectancy and a low impact on the environment. The chosen material for Marley Alutec's products is aluminium which has all these qualities. Alutec is committed to designing the most sustainable, durable and high performance rainwater systems possible. Our eaves solutions lead the market; all have a life expectancy of 50 years or more and require little or no maintenance.

**WE RESPECT  
THE PAST,  
WE CARE FOR  
THE PRESENT  
AND WE  
DESIGN FOR  
THE FUTURE.**

**MARLEY ALUTEC IS THE  
UK MARKET LEADER IN  
INNOVATIVE ALUMINIUM  
RAINWATER AND EAVES  
SOLUTIONS.**

## **UNIQUE INNOVATIONS**

Every challenge crossing our path is an opportunity for Marley Alutec, developing solutions to meet all sector and client requirements. Customers' satisfaction is vitally important and design and innovation are at the heart of Marley Alutec's success.

As a customer-focused solution provider, Marley Alutec will deliver bespoke solutions utilising the latest technology in aluminium materials and processes.

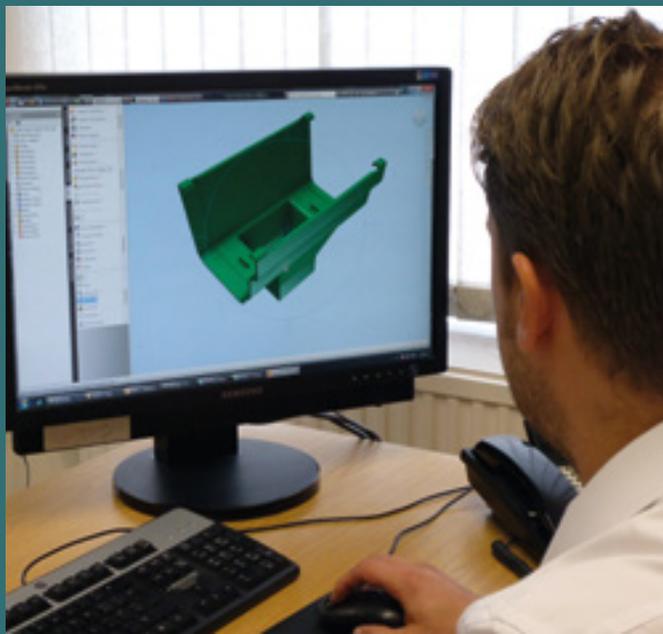

Alutec manufactures a number of unique patented products which have been recognised by the industry through prestigious awards.

# BEST IN SERVICE

Committed to delivering the excellent service and technical expertise that only comes from partnering with a specialist manufacturer, Marley Alutec offers a full turnkey service, from the development of initial designs, to the delivery of detailed estimates and on-site assistance.

At Marley Alutec we value our supply chain to deliver market-leading quality materials on time. We have dedicated and passionate people in every department who are supporting our customers at all stages of the supply chain from specifier to architect to merchant to contractor to installer.

Our in-house and field teams will assist you with every step of your project.

**COLLABORATION  
IS CRUCIAL TO  
OUR SUCCESS.**

## WORKING IN PARTNERSHIP

The foundation of Marley Alutec's approach is trust, collaboration and partnership. We work together to meet objectives. We deliver on time and even exceed your expectations. In this way, we will continue to be proactive and motivated and remain a competitive and reliable partner.

Marley Alutec has a wide distribution base developed through close relationships. We have supply agreements with independent merchant buying groups NBG and Fortis and national builders merchants including Wolseley, Travis Perkins, SIG and others.

Collaboration is crucial to our success. Marley Alutec work very closely with a number of market leaders, including: Icopal, IKO Group, Wienerberger and Trivselhus by Esh.

# LOOKING INTO THE FUTURE

The construction industry is dynamic. We live in a changeable and high tech world and in order for us to stay up to date with the latest technologies and remain innovative, we invest our efforts to create new opportunities.

This is why we are firmly fixed on the future needs of our customers. As market leader, Marley Alutec is the first rainwater systems manufacturer offering BIM objects for its entire product portfolio.

Marley Alutec also works closely with professionals to share expertise and has developed a cutting edge Continuing Professional Development (CPD) presentation, accredited by RIBA, designed to help architects and specifiers maintain their professional accreditation.

**WE ARE THE LEADER IN  
OUR INDUSTRY AND WE  
ARE PROUD TO CONTINUE  
LEADING THE REST.**

# MARLEY ALUTEC AND THE £300M PROGRAMME

Following a stringent tendering process from Sheffield City Council, Marley Alutec's rainwater and eaves systems were specified because they met with the council's commitment to provide housing and services that go beyond the industry standard. In particular, the impressive durability, lifecycle costs and sustainability credentials of Alutec's products meant that they were a perfect fit. This is the largest re-roofing project ever undertaken not only in the UK but in Europe. Marley Alutec is providing solutions for both phases of the project: flat roofs and pitched roofs.

**“We are delivering a massive £300m investment programme for the next five years to completely transform approximately 26,000 homes owned by our Council in numerous sites in Sheffield. We need to attract the best contractors to deliver the work, who will provide high quality solutions to fit our needs for the long term.”**

Janet Sharpe, Director of Housing and Neighbourhoods Service at Sheffield City Council

# THE FUTURE OF HOUSEBUILDING NOW

A landmark new housing project developed by Wienerberger, the leading provider of wall, roof and landscaping innovations. Planned in conjunction with global engineering and design consultancy ARUP, the e4 brick house™ concept is based around four fundamental principles of energy, economy, environment and emotion.

Designed to achieve standards such as Part L 2016 and complying with Lifetime Homes and the London Housing Design Guide, the Wienerberger e4 brick house™ provides a real solution to the current housing crisis.

**“The Wienerberger e4 brick house™ represents a significant step forward in the progression of UK housing and offers an accessible model that can be implemented now. Choosing the right materials was therefore crucial in achieving the build.**

**“Marley Alutec’s products were a perfect fit in this respect as their longevity, sustainability and low maintenance requirements meant we could deliver not only the type of building we wanted to but the intended lifestyle for the future residents as well.”**

Paul Surin, Head of Built Environment at Wienerberger

# MARLEY ALUTEC MAKES IT POSSIBLE WITH BIM

The small development of four timber-framed, low energy, sustainable dwellings is the flagship project for Space Architecture's latest invention: the Spacehus. It is a shining example of what can be achieved through BIM-only construction and the support of our highly knowledgeable technical experts.

**“Choosing Marley Alutec to work on Valleydale Mews was easy, the comprehensive BIM portfolio allowed for a quick and detailed specification process. In particular Marley Alutec’s technical department were great to work with: having supplied 2D drawings extracted from our BIM model, Alutec did the rest and we had no need to go back with any amendments.**

**Sustainability and aesthetics were also key requirements for this project. Marley Alutec’s products have impressive performance and sustainability credentials in addition to their contemporary style that fitted perfectly with our build ethos.”**

Ryan Wigham, Architectural Technologist at Space Architecture

**THE UK LEADER  
IN INNOVATIVE

# ACCREDITATIONS, STANDARDS AND MEMBERSHIPS

## ACCREDITATIONS

### ISO 14001:2004

Alutec is committed to continually reducing its environmental impact across all its business activities and is accredited to ISO 14001: 2004.

### RIBA CPD Service

Alutec is a leading CPD provider for aluminium eaves solutions. Alutec's RIBA accredited CPD covers all aspects of eaves design, selection and correct installation.

### Investors In People

Marley Alutec is accredited to the Standard of Investors In People. IIP is a management framework for high performance through people and their prestigious accreditation is recognised across the world as a mark of excellence.

## STANDARDS

For the optimum solutions, our product portfolio complies with a full range of British and European standards including:

### BS 8530

Traditional style aluminium gutter systems – specification

### BS 9101 (draft)

Steel and aluminium rainwater systems – specification (Draft)

### BS EN ISO 9227

Corrosion tests in artificial atmospheres – salt spray tests

### BS EN 12206-1

Paints and varnishes – coating of aluminium and aluminium alloys for architectural purposes

### BS EN 1462

Brackets for eaves gutters – requirements and testing

## MEMBERSHIPS

# MARLEY ALUTEC, PART OF ALIAXIS A GLOBAL LEADER

'Our brands have strong identity and are firmly established in the markets they serve. Aliaxis is present in over 40 countries, has more than 100 manufacturing and commercial entities and employs 15,700 people. In addition to the well-established markets of Europe and North America, we have operations in Latin America, Australasia and Asia.

We leverage our local and global knowledge of the industry, regulations and building habits to provide consistently excellent customer service through our distribution partners to building installers, infrastructure contractors and others. Thanks to the entrepreneurial spirit of its local people, balanced with the strengths, know-how and international reach of the Group, we continue to develop and improve our positions in key building applications throughout the world.'
