

All dimensions are in mm.

Product code	Description	Width (mm)	Flow performance l/s*
PC300	Parapet Chute 300mm	300	2.59
PC500	Parapet Chute 500mm	500	4.31

\*All flow data stated is based on a non-grated deployment. For more information about system performance, please contact the Alutec technical team

Product description

Marley Alutec's Elite PC300 and PC500 parapet chute outlets are suitable for commercial, industrial and domestic applications. They are designed for use with bituminous, multi-layer and single ply waterproofing membranes.

All components are manufactured from 3mm thick marine grade alloy with austenitic stainless steel retaining bolts.

- Suitable for all standard applications
- High performance
- Free technical advisory service
- 50 years functional life expectancy
- Near zero maintenance
- Durable and strong

System components

Online drainage design tool

The Elite range comes complete with an online drainage design tool, in full compliance with BS EN12056-3, allowing fast and simple drainage design whilst ensuring correct product specification. Click below to access the tool:

**Clause:** R10/365  
**Product:** Alutec Elite roof outlets  
**Type:** 300 / 500mm wide chute (parapet)  
**Manufacturer:** Marley Alutec, Unit 1 (G-H), Hudson road, Elms farm Ind. Estate, Bedford MK41 0LZ

Product information

## Technical Services Department

Marley Alutec Technical Services Department has many years' experience in assisting specifiers with all aspects of drainage design and installation. For advice, contact them on [technical@marleyalutec.co.uk](mailto:technical@marleyalutec.co.uk) or call 01234 344108.

## Installation

Parapet chutes consist of body and clamp/grate assembly. The waterproof membrane should be dressed into the outlet body, clamping ring is then secured over the waterproofing layer via the nut and threaded studs, to prevent water ingress between waterproofing membrane and parapet outlet. The grate acts as a guard against airborne debris from blocking the outlet.

## Fire Ratings

Aluminium is a listed non-combustible material as defined by BS476:Part 4, similar to other metals i.e. steel, brass, copper etc. These items are manufactured solely from aluminium alloy and is therefore non-combustible.

## Environmental

Marley Alutec is committed to continually reducing its environmental impact and is accredited to ISO 14001:2015.

## Standards

All Marley Alutec systems are manufactured to and in excess of the appropriate BS or EN Standards.
